Brief Project Description

The Project is proposed within the fence line of the existing East Windsor Cogeneration Centre (EWCC) and will provide up to approximately 107 MW of additional gross generation capacity to the Windsor-Essex area and provincial electricity grid. Although the Project will make use of some existing infrastructure, including tying into the existing EWCC high-voltage interconnection line, it will be owned by a separate Capital Power entity. The Project site will be approximately 0.61 ha in size. Additional temporary construction areas will be required including staging and laydown areas, temporary workspace and construction parking.

The Project was awarded a contract from the IESO in May 2023. In accordance with the IESO contract, the Project must achieve commercial operations by May 31, 2026. Construction start is subject to receipt of all required permits and approvals. Construction is anticipated to take approximately 12 – 18 months.

Was a Screening Report prepared?

- Yes No

Was an Environmental Review Report prepared?

- Yes No

Was an Equivalent Review Report prepared?

- Yes No

Availability of Documentation

- Same as Site Address

Proponents are required to retain, either on site or in another location where they will be readily available, any Screening Report, Environmental Review Report, Equivalent Review Report, Addendum, and related notices and Statements of Completion prepared under the Environmental Screening Process, as well as documentation of any commitments made by the proponent to address concerns after one of the above-noted reports was prepared.
